Summary

Computer Science undergraduate and full-stack developer with over 2 years of experience building web and mobile applications, ERP systems, POS systems, and custom business solutions. Passionate about exploring new technologies and determined to tackle challenges with innovative and optimistic solutions. Strong foundation in both frontend and backend development, with a focus on delivering scalable, high-quality software.

Education

University of Ruhuna- Bachelor of Computer Science

September 2023 – Present

- GPA: 3.36/4.0

Experience

Full-Stack Developer — NBit Software (Pvt) Ltd | Kadawatha

October 2022 – November 2024

- Technologies: **PHP, CodeIgniter, MySQL, AJAX, jQuery, AWS, GitLab**
- Developed web and mobile applications, ERP systems, POS systems, and custom business solutions.
- Contributed as a full-stack developer throughout the entire software development lifecycle: planning, coding, testing, deployment, and maintenance.
- Collaborated with multiple clients to gather requirements, deliver custom modules, and ensure timely project delivery.
- Worked extensively on database design, optimization, and complex queries using MySQL.
- Implemented version control and **team collaboration using GitLab and AWS CodeCommit**.
- Applied Agile development practices to ensure efficient project management and timely delivery.

Technical Skills

- **Programming Languages:** C, C#, Java, JavaScript, Python, PHP, Dart
- **Backend:** Spring Boot, ASP.NET, Express.js, MongoDB, MySQL, SQLite
- **Frontend:** Next.js, React.js, Tailwind CSS, Bootstrap, HTML5, Figma
- **DevOps:** GitHub, GitLab

Projects

Tripgenix — Tour Management System (Final Year Project)

October 2025 — Present

- **Technologies:** Spring Boot, React.js, Tailwind CSS, shadcn/ui, Supabase, SQL, Google Maps API
- Built a tour management system to assist travelers and travel agencies in finding optimal routes and organizing tours using web and mobile platforms.
- Implemented the **backend using Spring Boot** with a **microservices architecture** to support scalability and service separation.
- Built modern, responsive user interfaces for the **web platform and management dashboard** using React.js, Tailwind CSS, and shadcn/ui.
- Integrated **Google Maps API** for real-time location tracking, route visualization, and destination mapping.
- Utilized **Supabase and SQL databases** for secure data storage and efficient data management.
- Used **GitHub** for version control and collaborative development.
- Managed project planning, task assignments, and progress tracking using **Trello**.
- **Project Status:** Under development.

- **Technologies:** ASP.NET, C#, ESP32, Ultrasonic Sensors, Postman, Swagger, JWT Authentication, Trello
- Developed a **Smart Garage Management System** using **ASP.NET and C#**, following **software design patterns** to ensure a scalable, maintainable, and secure architecture with **JWT-based authentication**. Integrated an **IoT-based parking slot detection system** using **ESP32 and ultrasonic sensors** to identify **real-time parking availability** and automatically assign free slots to scheduled vehicles. Built and tested a physical garage model to validate sensor accuracy and system reliability, performed **API testing and documentation** using **Postman and Swagger**, and managed team collaboration through **Trello**.

Goldsmith — E-Commerce Web Application

September 2025

- **Technologies:** PHP (Core PHP, MVC Architecture), Bootstrap, Figma, AJAX, JavaScript, PayPal API, AdminLTE
- Developed **Goldsmith**, a fully responsive **e-commerce web application** using **Core PHP with MVC architecture**, handling both **front-end and back-end development**. Implemented **role-based access control** for customers, clients, and administrators, and built **interactive dashboards and sales analytics** using **AdminLTE**. Developed a **dynamic shopping cart system** with real-time updates using **cookies and AJAX**, integrated a **secure PayPal payment gateway** for online transactions, and ensured a **clean, modular, and scalable codebase** through proper architectural practices.

Certifications Online Courses

Spring Boot 3, Spring 6 and Hibernate — Udemy

November 2025 – January
2026

- Topics covered: Spring Boot 3, Spring Framework 6, Spring Boot Core, Spring Boot Annotations, Spring MVC, Hibernate/JPA CRUD, Spring Boot 3 Security, Spring Boot 3 REST API, Maven

Postman API Fundamentals Student Expert — Postman

May 2025 – July 2025

- Learned to effectively use Postman for API development: handling variables, managing authentications, performing API testing, and automating test workflows.

Advanced React — Meta (Coursera)

April 2025 - May 2025

- Topics covered: React.js, Software Design Patterns, API Designs, Jest (JavaScript Testing Framework), Unit Testing, UI Components Handling

Volunteering & Community Involvement

- **Senior Editor — Computer Science Student Community** | University of Ruhuna
- **Organizing Committee Member — Technical Team Leader** | RushCoder 3.0 Hackathon, University of Ruhuna
- **Organizing Committee Member — Technical Team** | Insurgex Hackathon, University of Ruhuna
- **Member** | Leo Lions Club of Tholangamuwa Youth
- **Treasurer — IT Society** | Dudley Senanayake Central College

2020 – 2021
