Summary

Computer Science undergraduate and Full-Stack Developer with **2+ years of software development experience** building web applications using **C#, ASP.NET Core, React.js, TypeScript, and SQL**. Skilled in RESTful API development, database design, authentication, and Azure DevOps, with experience in **Microservices, Modular Monolith, and Clean Architecture**. Familiar with Agile development, technical documentation, and AI-assisted software engineering.

Education

University of Ruhuna - Bachelor of Computer Science *September 2023 – Present*

- GPA: 3.48/4.0

GCE Advanced Level Examination - Physical Science Stream *2021(2022)*

Experience

Software Engineer Intern - Creative Software | Sri Lanka *April 2026 – October 2026*

- **Technologies:** C#, ASP.NET Core, React.js, TypeScript, SQL Server, Azure DevOps, Docker, Playwright, Git, Figma, Claude Code, GitHub Copilot.
- Contributed to the development and maintenance of the **OneTrip Commerce Platform (BookNordics)**, implementing full-stack features using **ASP.NET Core**, **React.js**, and **TypeScript**.
- Worked with **Microservices Architecture** and **Modular Monolith Architecture**, contributing to backend services, API integration, and feature development using **ASP.NET Core** and **Clean Architecture** principles.
- Developed frontend modules for the **Xtranet Platform** using **React.js** and **TypeScript**, contributing to modular backend components, business logic, and application integration.
- Used **Azure DevOps** to manage user stories, tasks, sprint boards, and Agile workflows. Prepared software requirement specifications (SRS), technical documentation, feature designs, and development effort estimates.
- Applied **AI-assisted development** using Claude Code and GitHub Copilot for code generation, debugging, refactoring, and problem-solving. Used **Obsidian** and **Graphify** to organize technical knowledge and project context, and **Figma** and **Google Stitch** to design and prototype user interfaces.
- Contributed to the full **SDLC**, including requirement gathering, SRS documentation, ER diagrams, system architecture, UI/UX design, development, testing, and deployment.
- Collaborated with developers and cross-functional team members on feature implementation, code reviews, debugging, and integration within an **Agile development environment**.

Full-Stack Developer - NBit Software (Pvt) Ltd | Kadawatha *October 2022 – November 2024*

- Technologies: **PHP, CodeIgniter, MySQL, AJAX, jQuery, GitLab**
- Developed web and mobile applications, ERP systems, POS systems, and custom business solutions.
- Contributed as a full-stack developer throughout the entire software development lifecycle: planning, coding, testing, deployment, and maintenance.
- Collaborated with multiple clients to gather requirements, deliver custom modules, and ensure timely project delivery.
- Worked extensively on database design, optimization, and complex queries using MySQL.
- Implemented version control and team collaboration workflows using GitLab and AWS CodeCommit.

Technical Skills

- **Programming Languages:** C#, Java, JavaScript/TypeScript, Python, PHP
- **Backend:** ASP.NET, Spring Boot, Node.js, MongoDB, MySQL, SQLite
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, HTML5, Figma
- **Cloud & DevOps:** Azure DevOps, Docker, Git, GitHub, GitLab
- **Other:** Playwright (automation/web scraping), REST APIs, Microservices Architecture

Projects

BookNordics – Travel & Tourism (Creative Software) *April 2026 – October 2026*

- **Technologies:** .NET, ASP.NET Core, React.js, TypeScript, TanStack, Docker, Azure DevOps, Helm, Swagger, Postman, Playwright.
- **Backend Development:** Developed and maintained .NET backend services following Microservices Architecture.
- **Frontend Development:** Developed React.js components using React Hooks and TypeScript, leveraging TanStack libraries and contributing to UI design.
- **Health Monitoring:** Implemented health-check endpoints across microservices and integrated their status into the main application for centralized monitoring.
- **Build Information & DevOps:** Configured Azure DevOps pipelines to retrieve build IDs and build numbers, integrating build metadata into the application through Dockerfiles and Helm configurations.
- **API Integration & Testing:** Integrated REST APIs and used Swagger and Postman for API documentation, testing, and debugging.

Extranet Application -(Creative Software) *June 2026 – October 2026*

- **Technologies:** ASP.NET Core, C#, React.js, TypeScript, SQL Server, Entity Framework Core, Azure DevOps, Claude Code, GitHub Copilot, Obsidian, Graphify.
- Contributed to the full **SDLC**, including client requirement gathering, research, system design, UI/UX design, development, testing, technical documentation, and release preparation.
- Developed full-stack features using **ASP.NET Core**, **React.js**, and **TypeScript**, following **Modular Monolith Architecture** and **Clean Architecture** principles.
- Applied **AI-driven development workflows** using Claude Code and GitHub Copilot, supported by structured Markdown files, an Obsidian vault, and Graphify for project knowledge management and development context.

TripGenix – Tour Management System (Final Year Project) *October 2025 – January 2026*

- **Technologies:** Spring Boot, React.js, Tailwind CSS, shadcn/ui, Supabase, SQL, Google Maps API.
- Developed a web and mobile tour management system for travelers and travel agencies, featuring tour planning, route optimization, and destination mapping.
- Built backend services using **Spring Boot Microservices Architecture**, **integrated Google Maps API for location tracking and route visualization**, and used **Supabase and SQL** for data management.
