Summary

Computer Science undergraduate and full-stack developer with over 2 years of experience building web and mobile applications, ERP systems, POS systems, and custom business solutions. Passionate about exploring new technologies and determined to tackle challenges with innovative and optimistic solutions. Strong foundation in both frontend and backend development, with a focus on delivering scalable, high-quality software.

Education

University of Ruhuna- Bachelor of Computer Science

September 2023 – Present

- GPA: 3.25/4.0

Experience

Full-Stack Developer — NBit Software (Pvt) Ltd | Kadawatha

October 2022 – November 2024

- Technologies: **PHP, CodeIgniter, MySQL, AJAX, jQuery, AWS, GitLab**
- Developed web and mobile applications, ERP systems, POS systems, and custom business solutions.
- Contributed as a full-stack developer throughout the entire software development lifecycle: planning, coding, testing, deployment, and maintenance.
- Collaborated with multiple clients to gather requirements, deliver custom modules, and ensure timely project delivery.
- Worked extensively on database design, optimization, and complex queries using MySQL.
- Implemented version control and **team collaboration using GitLab and AWS CodeCommit**.
- Applied Agile development practices to ensure efficient project management and timely delivery.

Projects

Smart Garage Management System — Desktop Application

June 2025 — September 2025

- **Technologies:** ASP.NET, C#, Postman, Swagger, JWT Authentication, Trello, IoT Devices
- Developed as a **university group project** focusing on smart automation and system optimization.
- Built using **ASP.NET and C#** for both backend and frontend components with strong emphasis on **design patterns, code optimization, and security**.
- Implemented **role-based authentication** and **JWT-based secure sessions** to ensure data safety and controlled access.
- Handled the **IoT module**, which monitors garage room air conditions and instantly triggers warnings on the dashboard if unsafe levels are detected.
- Conducted **API testing and debugging** using Postman to ensure reliable and optimized data communication.
- Managed project workflow and team collaboration through **Trello boards**, ensuring smooth coordination and timely task delivery.

Western Tour Company — Website and Web Application

July 2024 — August 2024

- **Technologies:** HTML, JavaScript, PHP, Bootstrap, jQuery, MySQL, cPanel
- Collaborated with **NBit Software (Pvt) Ltd** to build a responsive **tour booking platform** with dynamic package listings.
- Designed the complete **UI/UX** and implemented secure booking management with **email/SMS notifications**.
- Integrated a **MySQL database system** and deployed the application using **cPanel**.

Goldsmith — E-Commerce Web Application

September 2025

- **Technologies:** PHP (Core PHP, MVC Architecture), Bootstrap, Figma, AJAX, JavaScript, PayPal API, AdminLTE
- Developed both **front-end and back-end** for a fully responsive e-commerce web application, serving **both customers and clients**.
- Implemented **role-based access control** to manage different user permissions for customers, admins, and clients.
- Built **interactive dashboards and charts** using AdminLTE to analyze sales reports effectively.
- Developed a **dynamic cart system** managed through cookies with real-time updates.
- Followed **MVC architecture** to maintain clean, modular, and scalable code.
- Integrated a **secure PayPal payment gateway** for smooth online transactions.

Technical Skills

- **Programming Languages:** C, C#, Java, JavaScript, Python, PHP, Dart
- **Backend:** Spring Boot, ASP.NET, Express.js, MongoDB, PostgreSQL, MySQL, SQLite
- **Frontend:** Next.js, React.js, Tailwind CSS, Bootstrap, HTML5, Figma
- **DevOps:** GitHub, GitLab, Docker

Certifications Online Courses

Spring Boot 3, Spring 6 and Hibernate — Udemy

August 2025 – Present

- Topics covered: Spring Boot 3, Spring Framework 6, Spring Boot Core, Spring Boot Annotations, Spring MVC, Hibernate/JPA CRUD, Spring Boot 3 Security, Spring Boot 3 REST API, Maven

Postman API Fundamentals Student Expert — Postman

May 2025 – July 2025

- Learned to effectively use Postman for API development: handling variables, managing authentications, performing API testing, and automating test workflows.

Advanced React — Meta (Coursera)

May 2025 – April 2025

- Topics covered: React.js, Software Design Patterns, API Designs, Jest (JavaScript Testing Framework), Unit Testing, UI Components Handling

Volunteering & Community Involvement

- **Organizing Committee Member — Technical Team Leader** | RushCoder 3.0 Hackathon, University of Ruhuna
- **Organizing Committee Member — Technical Team** | Insurgex Hackathon, University of Ruhuna
- **Member** | Leo Lions Club of Tholangamuwa Youth
- **Treasurer — IT Society** | Dudley Senanayake Central College 2020 – 2021
- **Committee Member — Science Society** | Dudley Senanayake Central College 2020 – 2021
